Schaup-Werner, from Allentown, Pennsylvania, who was staying next to the Hotel La Romana, in the luxury BahÃfa Principe Bouganville, died on May 25, while taking a drink from the mini bar from the room with her husband. On Monday, the FBI released toxicological reports on Americans who have been mysteriously died in the Dominican Republic at the beginning of this year. According to the FBI report, all tourists died of natural causes. The FBI toxicological results will soon be disclosed as part of the investigation on the eruption of tourist deaths in the dominican republic, "as families launched former probes, according to a new relaturity." The family wants to know the truth. Mine more deep condolences go to the families of American tourists who died. Punta Cana, Dominican Republic in June, forwardkeys, which analyzes more than 17 million flight reserves per day, has released a report that shows that summer reserves for the Dominican Republic from the United States fell 74.3 percent in comparison with the same period of 2018. No leisure travel analysis shows an impressive correlation. The results of toxicological tests performed in tourists who died in the dominican republic in separate incidents this year are ... The results of additional extensive toxicological tests conducted to date have been consistent with the findings of local authorities (Dominican Republic). reads a statement from the Office of Consular Affairs of the State Department as reported by Fox News. A toxicology exam will additionally be performed on Holmes and Day, the engaged couple from Maryland who were found dead in their room at the Grand Bahia Principe La Romana on May 30, five days after checking in to the all-inclusive resort. They don't want investigations to be skewed. The results of the additional, extensive toxicology testing completed to date have been consistent with the findings of local authorities, a State Department spokesperson told The Hill, despite initial assumptions that the tourists died due to tainted alcohol served at several resorts. I'm not suggesting that would be the case, but they simply want to take no chances. The FBI has been assisting Dominican authorities in the investigation, which includes analyzing alcohol samples from one of the Bahia PrÃncipe resorts. Relatives of Miranda Schaup-Werner, 41, Nathaniel Holmes, 63, and Cynthia Ann Day, 49, have ordered their own autopsies following their mysterious deaths. In May, the Washington Post reported. These findings may help boost tourism to the Dominican, which has greatly suffered following the deaths of at least 10 tourists. Results of the toxicology tests will be released in a few days, the Washington Post reported. Methanol poisoning from tainted alcohol was ruled out by the FBI in these cases during the toxicology screening, and it was not the finding in any other cases of U.S. citizen deaths investigated by Dominican authorities. According to additional reporting by Fox, the FBI has delivered the results of those toxicology reports to the families of the deceased. Dominican Ministry of Tourism personnel did not respond immediately to At the mat of tourists and the issues resulting about the security guards in the Dominican Republic, travel agency groups and resort operators have sought to reassure consumers about the safety of the country. Between January and September of this year in comparison 2018, blaming the declining in the sensational reports of media analyzing and correcting wrong news in the social communication media that can be harmful For tourist destinations all over the world. oenostos condolians are with the families during this difficult time. FBI to the families of people who have died and Dominican authorities on September 16, 2019 The State Department says that FBI toxicological reports on the mysterious deaths of US tourists in the Dominican Republic did not show any inconsistent evidence with the discoveries of the insular nation of natural causes. The department says that "the results of the additional and extensive toxicological tests completed until now have been consistent with the discoveries of local authorities." The Department says that the families were informed of the results. The first deaths that arrived at the headlines were in May, when a couple apparently died at the same time in the same hotel room. The Minister of Tourism of the Dominican Republic said in June that the deaths They were not part of any mysterious ethanis of fatalities, but they were a statistically normal phenomenon being combined by the US media. Preliminary autopsies of the Dominican Republic discovered that three died of respiratory insufficiency and pulmonary edema, or excess of aralced .odacnumoc mu me .sveKdrawroF ad sthgisni ed etnediserp-eciv .itnoP reivilO essid ÃAnacinimoD acilbºÃpeR a arap sneqaiy san ocit; Amard otcapmi mu odit ret mecerap sacig; Art e setnecer setrom sauS tuQ .seuÃmlup son
